Note that each King ended his Reigne at such time as the next King following began his Reigne.

This Table of Computation, though successiuely but one, yet is diuided into 5. seuerall Tables; then euery Table is diuided into 3. seuerall columes or rowes, vnder seuerall Titles: as the first row is vnder the yeere of our Lord, beginning at 1485. at what time K. *Henry* 7. began, and so continuing to the yeere 1649. The next row is vnder the Kings Reigne, shewing how the yeere of the Kings answere to the yeere of our Lord, And the last row is placed vnder the Title of Easter day, shewing what day of the moneth Easter day fell vpon any yeere since the yeere 1485, to the yeere 1649. In which row also be certaine capitall letters placed, which be the latter Dominicall letters in the Leape-yeere.

Now all the difficultie in computating of time, is, when the question is onely propounded by the yeere of the Kings reigne: and therefore if you can deuise when any question is made by any yeere of any King in this Table mentioned, to know in what yeere of our Lord it was, then the labour is nothing; for you must note, that euery yeere of any King as yet, began in one yeere of our Lord, and ended in the next ensuing yeere, which is the cause of this difference. Example.

Quest. I haue a Lease for an hundred yeeres bearing date in Aprill 1536, and I would know this yeere 1620, what time I haue remaining.

Answere.

Seeke first the yeere of our Lord 1536, and [illegible] gin to tell at the next yeere forwards, calling 1537 one, 1538 two, and so [illegible] till you come to 1620: so shall you count to the number of 84 yeeres, and [illegible] your 100. yeeres be expired: But in numbring thus, you must remember, th[illegible] before and after the change of euery Prince, one and the same yeere of our Lord is [illegible] placed, therefore omit the one in your reckoning.

But if you haue a Lease granted for certaine yeeres, and dated in any yeere of the Kings reigne, and would know how many yeeres thereof are expired; doe but seeke in the Table of Computation for that yeere, of the Kings reigne your Lease was dated, and note against what yeere of our Lord it standeth, and on the next ensuing yeere begin to count to your proposed yeere, as before; onely obseruing the difference of time betweene the beginning of the yeere of our Lord and the beginning of the yeere of the Kings reigne. For you must note that the Regnall yeeres stand periodicall, or compleat, against the yeere of our Lord: so that the Regnall yeere standeth against that Ecclesiast yeere, or yeere of our Lord it ended in, and not against that it began in.

[illegible]ning, continuance, and ending of the Reigne of the Kings of England, from the Conquest vntill the yeere 1620.

To know the day of the New and Full Moone.

To finde in the Kalender the change or full Moone, you must note that they haue Primes both, in seuerall Columes vpon the left hand [illegible] euery moneth, vnder this Title Prime ☌. Prime ☍. therefore when you know what the Prime is for the proposed yeere, seeke the same in one of the rowes of Primes des[illegible]ing, and note against what day of the Moneth it stands: for that is the day of the change or full Moone, according to the Prime you tooke, whether it was the Prime ☌, [illegible] change, or the Prime ☍, or full Moone.
